

Highland Soil and Water Conservation District

2023 Annual Tree Seedling Sale

These windy days remind us how useful windbreak trees are. Effective windbreak plantings save energy dollars, paying for themselves times over the years. Traditional windbreaks are single rows of trees, spaced evenly apart but to get faster results, two rows staggered will help fill gaps quickly. Winter is the perfect time to plan for your spring tree plantings. Not only can trees provide windbreaks, they also do essential tasks like: improve water quality, control soil erosion, increase agricultural production, enhance wildlife habitat or just beautify your surroundings! This year the Highland Soil and Water Conservation Districts' Annual Tree Seedling Sale will offer hardy tree seedlings and white vinyl marking flags. This is a great opportunity to make purchases at a minimal price with a maximum long-range benefit.

There will be a variety of tree seedling packets offered on a first come, first serve basis until sold out. So get your order in early. The pick up date will be April 7th at the Liberty Township building in Hillsboro. After you have placed your order, a reminder post card will be mailed to you closer to the scheduled date. Because of the low cost, we cannot furnish seedling replacements, nor can we mail or deliver your order. Remember that these seedlings are from one to two years of age and average 8 to 10 inches in height. Most orders will fit in a regular size grocery bag. Fill out the attached order form below and return to us along with your payment to ensure that your order gets filled. If you have questions, contact our office at 937-393-1922 Ext #3 or visit our website at www.highlandswcd.com and click on the tree sale tab for more information. *If you are tax exempt, please figure your total without sales tax & provide an exemption form with your order.*
